Progress Update Details

The groups must present the following in their progress update:

1. The group must present the paper that it will replicate.
2. The group must discuss its methodology. It should present the hypotheses to be tested, econometric model to be used, and definition of the variables in the model.
3. The group must present updates on gathered data by showing:
 - a. The descriptive statistics of the data.
 - b. The number of observations.
 - c. Other properties of the data.

If the group has not gathered the data yet, the group must identify the issues or challenges it faced as to why it has not gathered the data yet. The group must also identify its next steps in order for it to gather the data.

4. The group must present the next steps that it will take to complete the analysis/project.

Reminders:

1. The progress update is **not a graded activity**.
2. Each group only has 15 minutes to present, so plan the presentation accordingly.
